DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

1. Claims 67, 69, 84, 85, 87-90 and 92 rejected under 35 U.S.C. 102(a) as being anticipated by Shimizu (JP 2000-267591).

As to claim 67, Shimizu discloses a liquid crystal device having a structure as shown in figures 4 and 6. Note the liquid crystal panel 10 comprising substrates 11 and 12. The substrate is covered with an anisotropic conductive film for mounting an integrated circuit chip 133. The integrated circuit chip 133 is mounted to the underside of substrate 11 and is positioned so as to protrude from the anisotropic conductive film. The anisotropic conductive film can be construed as being a protective material having a flat face. Note the light guide section 95, which contains an opening for storing the integrated circuit chip 133, thus acting as a holding member.

As to claims 69, figures 4 and 6 show that the holding member is disposed so as to cover the liquid crystal panel. As shown in figure 4, the light guide member 75 is designed so as to abut the liquid crystal panel for positioning.

As to claims 84, 85, 88-90 and 92, Shimizu discloses a liquid crystal device having a structure as shown in figures 4 and 6. Note the liquid crystal panel 10 comprising substrates 11 and 12. The substrate 11 is covered with an anisotropic conductive film for mounting an integrated circuit chip 133. An integrated circuit chip 133 is mounted to the underside of substrate 11 and positioned to protrude from both the substrate and the anisotropic conductive film. Note the light guide section 95, which contains an opening for storing the integrated circuit chip 133, thus acting as a holding member. Note in figure 4, the notch 73c, formed from the outside at an area where the integrated circuit chip 133 is not situated.

As to claim 87, the slot 73c disclosed by Shimizu in figure 4 can be construed as being a hole. It is provided at an area where the integrated circuit chip 133 is not situated.

Allowable Subject Matter

Claim 68 and 77-83 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art did not teach or suggest a holding member having a plurality of storing portions for storing a plurality of electronic parts.

Claim 91 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record did not teach or suggest a first holding member disposed to cover the first panel substrate, and a second holding member disposed to cover the second panel substrate.

Claim 86 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record did not teach or suggest a light source being stored in the notch.
